

# Speedy Mop®

## Roller Sponge Mops

Speedy Mop® roller sponge mop is designed to transfer the natural mopping action into a rolling, digging action in the sponge head, quickly loosening ground in dirt. The genuine cellulose sponge head is 5 times more absorbent than foam rubber. Wringer rollers squeeze dirt and water out of the sponge head.

### FEATURES

- Genuine cellulose sponge head
- Vinyl wringer rollers
- Wringer is located half way up the powder-coated steel handle
- Plated steel components
- Three sizes to choose from

### BENEFITS

- Picks up more water than a foam rubber sponge head
- Water and dirt are squeezed out of the sponge head, not into it
- Easy wringing without bending
- Durable construction withstands rigorous use

### PREMIUM SPONGE MOP

Speedy Mop® is constructed with plated steel components to withstand rigorous use. Sponge head is genuine cellulose, 5 times more absorbent than foam rubber. Pure vinyl wringer rollers squeeze dirt and water out of the sponge head. Wringer is located half way up the steel mop handle for easy wringing with no bending. Power strip refill has an abrasive strip attached for heavy duty scrubbing.
